THE TENTH ANNUAL REPORT
OF
The Visiting Justices
OF THE
LUNATIC ASYLUM, AT ABERGAVENNY,
To the several Courts of Quarter Sessions
FOR THE
UNITED COUNTIES AND CITY OF HEREFORD.

The Visiting Justices have again the pleasure to report that the Asylum has been managed during the past year to their entire satisfaction.

The number of patients presents an increase as compared with the report of last year, but not a very large one. The health is generally good.

At the date of the last report the numbers were—

Males	180	
Females	244	
		—————424
Admitted during the year—Males	57	
	Females ..	67
		—————124
		—————548
Discharged, recovered, or relieved	62	
Escaped	3	
Out on Probation	2	
Died	39	
		—————106

The numbers at the present date are—

Males	197	
Females	245	
		—————442

On the females' side there is accommodation for 257 patients; the number of inmates being 245, there is vacant accommodation for 12.

On the males' side, and at the farm buildings, there is accommodation for 198. There are at present 197 patients — vacant accommodation for 1.

A plan has been submitted by the Superintendent, by which, for an outlay of about £50, accommodation for about eight more male patients may be obtained at the farm buildings.

The Committee have ordered this plan to be carried out.

The sum to be expended on repairs and building account, amounting to little more than £100, the Committee have not thought it necessary at present to make any call on the United Counties and City of Hereford.

With the intention of giving early notice to the respective Courts of Quarter Sessions of the probable necessity of making ere long provision for a larger number of Lunatic Patients, the Visiting Justices subjoin an extract from the report of the Commissioners in Lunacy, made at their last visit to the Asylum in September, 1862 :—

“We are of opinion that the extreme limits of accommodation have been reached in the old building, and that no more beds can be placed there—from 460 to 466 patients may be accommodated, but that is the extreme limit.”

The Visiting Justices think it due to the exertions and care of the Superintendent and his assistant, to add the observation of the Commissioners in Lunacy contained in the same report upon the general state of the Asylum :—

“The general condition of the Asylum continues to reflect very high credit on Dr. M'Cullough, and on the efficiency and zeal of the assistant medical officer, Dr. J. J. Thom, and of all concerned in the working of the Institution.”

The Visiting Justices, with a view of keeping down the number of patients, desire to impress upon all parish officers the expediency of taking care that no patients should be sent but those who are *bona fide* paupers. Patients whose friends or relatives engage to indemnify the parish for the expense of their maintenance in the Asylum, cannot be considered as paupers, and ought not to be sent there. If many such were admitted, an immediate addition to the Asylum would be necessary.

A. CLIVE, Chairman.

Joint Counties' Asylum,
24th December, 1862.

COMMISSIONERS' REPORT.

ABERGAVENNY ASYLUM,

24th September, 1862.

Since the visit of Commissioners on the 12th August, 1861, the admissions here have been 141, the discharges 91, and the deaths 43. Of these discharged, 86 had recovered, 3 had escaped, and 2 were transferred to another Asylum. Two of those who escaped remain with their relatives, and the third is again here. All the deaths were from natural causes: the principal being from maniacal exhaustion, general paralysis, disease and softening of the brain, and phthisis. One, which took place on Tuesday last was very sudden; an epileptic female patient, left by the night nurse at half-past four o'clock in the morning, having been found, an hour and three-quarters later, lying on her face lifeless, with indications of having died in a fit. No inquest was held; but a post-mortem made yesterday showed suffocation to have been the sole cause of death. We have mentioned to Dr. M'Cullough the 44th Section of the New Statute requiring notice of all deaths to be in future sent to the Coroner.

Of the patients now on the books of the Asylum, who are in number 433, there are 188 males and 245 females; and, excepting one man and three women out on trial, we have seen them all at our visits yesterday and to-day. Upon the whole they were in a satisfactory state. Patients of every

class, in both divisions, appear to be brought together and mixed in the wards as far as is found compatible with the general comfort; and for the most part with good result. All were clean and suitably clothed; the women especially so; and while no complaints were made to us, several spoke gratefully of their treatment.

The recorded cases of seclusion seem a little more numerous than at the last visit, comprising 28 patients who have been secluded altogether 64 times: a few for as much as 11 hours, four occasionally for the whole day; two, each on one occasion, for upwards of two consecutive days; but by much the greater part for short terms varying from fifteen minutes to three or four hours, and apparently resorted to, in many of these instances for protection of the quiet patients in absence of any strict classification, as well as to save others from consequences attendant on their troublesome habits.

We found the dormitories and single rooms throughout the Asylum, and in the new laundry buildings, clean and fairly ventilated, and the bedding was ample and in thoroughly good order. Washing basins, looking glasses, brushes, combs, and some seats have been introduced since the last visit into some of the old dormitories, which it is very desirable should be brought gradually into an equally well furnished state with those in the new building. Having this in view, and considering the unavoidable absence of air and space in the attic floors, we are of opinion that the extreme limit of accommodation has been reached in these parts of the old building, and that no more beds should be placed in them.

Since the last visit, the back airing ground of the female side has been completed; laid out with elevations commanding a very beautiful view; and planted. In the front male airing ground, a summer house with thatched roof has been

placed; and it is intended that one shall ultimately be in every court. The padded rooms, as suggested, have been better ventilated. By conversion of the old laundry; of some rooms used formerly as dormitories; and of others heretofore in the occupation of Dr. M'Cullough, who is about to move immediately into his new house; the kitchen offices have been improved; good dining rooms obtained for the attendants in both divisions; and a group of excellent well ventilated workshops provided, adjoining each other. The latter had been begun at the last visit.

Other improvements then in progress in the wards, and contributing to their comfort in a domestic sense, have since also been completed. In all the back as well as front corridors, now used as sitting rooms, there are open fireplaces; and they are made otherwise more cheerful. We were pleased to find that the Assistant Medical Officer had reared and domesticated for the amusement of the patients during the past year, upwards of fifty birds of various kinds; and that these are now distributed in cages through the wards, where the patients take care of them, and are interested in them.

The dining arrangements are very good. Tables fitting into the recesses of each window are laid in the corridors, at which the inmates dine in groups of from 8 to 12. Excepting the few who are sick, there were only two patients not assembled at them; and the dinner, which consisted of roast beef and two vegetables of excellent quality, was served with much apparent comfort.

One bagatelle board has been placed in each division since the last visit, and we hope that more will be gradually introduced. There seems to be a fair supply of papers, books, and cheap illustrated publications; but these might with advantage be more generally distributed through the day

rooms. The evening classes for instruction, organized by the Chaplain have been attended during the summer by fifty patients, the number being smaller than in the winter months; and by holding these classes, not in the chapel, but in the wards themselves, and so connecting them with a home feeling on the part of the patients, a good effect has been produced upon the other inmates not hitherto sharing in them.

The provisions for out-door exercise and recreation generally continues to be excellent. Every Monday evening parties of both sexes are associated in music and dancing, in aid of which there is a small brass band, with violin and violincello. Several in-door and out-door games, appropriate to each division, have been introduced. Parties are taken daily for walks beyond the Asylum. The Saturday half holiday is kept. About half a dozen special treats appear to be given during the year; and some patients of both sexes are taken occasionally to lectures, or to public amusements.

The average Sunday attendance during the two services at chapel is 105 men and 114 women; and the week day attendance, about 67 men and 45 women. The chapel will not hold more than 150, but different patients are taken in the morning and afternoon. The question of constructing a new chapel will have to be considered shortly. The present structure is insufficient for an Asylum containing nearly 450 patients.

About the farm, and in the wards, laundry, offices, and workshops 130 men and 173 women are regularly employed. Four of the male patients, who take charge of the pigs and cows, live altogether at the farm buildings, where sleeping as well as day accommodation has been provided, and the bailiff lives with them. Here also there appear to be means

of similarly providing for 8 or 10 more patients; and with this, and further appropriation of the rooms vacated by Dr. M'Cullough, it is estimated that as many as 460 or 466 patients may be accommodated in the existing buildings, or from 30 to 33 beyond the numbers now here. But this as we have already intimated, we regard as an extreme limit; and how long it is likely to suffice for the wants of the districts represented in the Asylum, is a question which will doubtless receive timely consideration by the Committee.

The health is good; 20 men and 17 women at present taking medicine, but few for serious disorders; and the general condition of the Asylum continues to reflect very high credit on Dr. M'Cullough, and on the efficiency and zeal of the Assistant Medical Officer Dr. Thom, and of all concerned in the working of the Institution.

JOHN FORSTER, } Commissioners
ROBERT NAIRNE, } in Lunacy.

REPORT
OF
THE MEDICAL SUPERINTENDENT
FOR THE YEAR 1862.

The Medical Superintendent has the honour of submitting to the Committee of Visitors his report for the year 1862, together with the usual Statistical Tables.

On the 1st of January last there remained under treatment 423 patients—181 males and 242 females. During the year there have been admitted 126, viz., 58 males and 68 females, being 16 males and 11 females less than in the previous year, in which the admissions were 153.

The total number under treatment during the year was 549, and the average number resident was 426, viz., 186 males and 240 females. The highest number resident at one time was 442 in December, and the lowest 412 in April.

The number discharged recovered was 60—24 males and 36 females, being in the proportion of 47·6 per cent. to the admissions. Seven patients were discharged relieved, and one not improved.

During the year 39 deaths have occurred—17 of males and 22 of females, being in the proportion of 9·1 per cent. of the average number resident. This is a rate of mortality considerably lower than that of any previous year. The lowest rate hitherto has been 10 per cent., and the average since the opening of the Asylum 11·8 per cent. Nine per cent. is a very low rate of mortality for an English County Asylum, where no patients are refused, and where patients are sent from workhouses and elsewhere in the last stage of disease,

and in the decrepitude of old age. I cannot attribute the low mortality of the past year to any particular cause. It is probably one of those accidental variations to which the statistics of limited periods are liable. The decrease was chiefly amongst the males. There has been no disease of a contagious character and no serious epidemic, while the health of the patients has been generally good.

At the close of 1862, 442 patients remained in the Asylum—197 males and 245 females. This is an increase in the year of 19—16 males and 3 females.

The admissions during the past year have been considerably lower than in any year since 1856, with one exception, 1859, when they were 122, or 4 less than last year. The average of the five previous years was 140. The number admitted for the first time was 102, or 19 less than in the previous year, while the re-admissions also fell from 32 to 24.

In two-thirds of those admitted there was a reasonable prospect of recovery, while in one-third, no hope of recovery could be entertained. This is about the usual proportion. A considerable difference existed, however, in the two sexes, with respect to the proportion of curable cases: of the males, while only 60 per cent. were curable and 40 incurable; of the females, 72 per cent. were curable, and 28 per cent. incurable. This difference arises chiefly from the greater frequency of organic diseases of the brain amongst men. In 1861, the difference was even greater—the proportion of males curable being 59 per cent. and of females 77.

The effect of this will be seen in referring to Table III. in the much larger percentage of recoveries amongst the females during the past two years; and a still more striking consequence is that while, during the same period, the number of males has increased 31, the females have only increased 10.

The proportion of recoveries for both sexes, viz., 47·6 per cent. is very satisfactory. It is much above the average, and higher than in any year since 1855.

Of the congenital cases—Idiots and Congenital Imbeciles—there has been a marked increase, nine having been admitted in 1862 as compared with three in 1861, and with four in 1860. It may be a question how far this result arises from the recent Act which makes patients in the Asylum chargeable to the Common Fund. So far as this Asylum is concerned, however, the Act has not yet led to that general increase of admissions which was anticipated. I still think, as I reported to the Committee at the time, that it may occasionally present an obstacle to the boarding out of harmless patients.

The only addition to the accommodation during the past year was obtained by fitting up some rooms at the farm for a few male patients. This has answered very well, and the number will be increased as soon as some alterations recently sanctioned have been carried out. The Laundry Building continues to answer its purpose admirably.

As regards the increase of patients, I have little to add to the opinion I have so often expressed, that while the number of admissions continues at anything like the present average, the number of inmates must increase until a considerably higher point is reached than has yet been attained. I fear there is little reason to expect a falling off in the admissions. The increase of patients during the last five years has averaged 25 per annum. During the past year the decrease in the admissions was counterbalanced by the low mortality, so that the increase was nearly as great as usual.

D. M. McCULLOUGH.

THE CHAPLAIN'S REPORT.

Joint Counties' Asylum, Abergavenny,
January 15th, 1863.

Mr. Chairman and Gentlemen,

In this, my tenth annual report, I have to repeat with unshaken confidence that the inmates of this establishment set a high value upon the religious provisions which are made for them; and the absence of these would undoubtedly leave a blank in the existence of many of them which would render their condition much less pleasurable, and therefore far less conducive to their restoration or improvement than it is at present.

The average attendance at divine service during the past year has been about 236 on Sundays—that is, half this number at each service, and about 105 on week days. The number of communicants when the holy communion was last administered was 20, and the behaviour on that occasion was devout and serious. Indeed, the behaviour generally during service surpasses expectation: the responses are repeated aloud by a goodly chorus of voices, and the chanting and singing are hearty and congregational.

Bibles, Prayer Books, and other religious books have been duly supplied whenever a demand for them occurred. The library books have been divided in parcels among the several wards, and periodically changed. Religious tracts are highly esteemed, and have consequently been extensively distributed.

There is an adequate supply of newspapers and periodicals, with a proper admixture among the latter of such as are of a religious and moral tendency.

I frequently visit the wards, and hold a conversation with those who are so disposed. In my visits, I endeavour to rally the desponding, to encourage the unemployed to take to some salutary occupation, and to discourage morbid and eccentric habits, in cases where this can be done with any chance of success, or without giving offence.

The evenings are made agreeable to the inmates by readings selected to suit the audience, by music, vocal and instrumental, and by various other recreations. The brass band now numbers several instruments, and is a source of much gratification.

Looking back over the ten years which have now come to a close, it must be highly gratifying to find that this establishment never answered its purpose better, or was never more efficiently conducted than at the present time.

I am, Gentlemen,

Your obedient Servant,

W. G. DAVIES.

To the Committee of Visitors.

DIETARY TABLE.—DAILY ALLOWANCE FOR EACH PATIENT.

	Bread.		Butter.*	Uncooked Meat 20 per cent allowed for bone.	Vege- tables.	Tea or Coffee.	Ale or Cider.		Additional Allowances for Working Patients.	
	M. Ozs.	F. Ozs.					M. Pint.	F. Pint.	Cheese.	Ale or Cider.
Sunday	16	14	1	5	1	2	$\frac{3}{4}$	$\frac{1}{2}$	1	1
Monday	16	14	1	5	1	2	$\frac{3}{4}$	$\frac{1}{2}$	1	1
Tuesday†	16	14	1	3	1	2	$\frac{3}{4}$	$\frac{1}{2}$	1	1
Wednesday	16	14	1	5	1	2	$\frac{3}{4}$	$\frac{1}{2}$	1	1
Thursday	16	14	1	5	1	2	$\frac{3}{4}$	$\frac{1}{2}$	1	1
Friday	16	14	1	5	1	2	$\frac{3}{4}$	$\frac{1}{2}$	1	1
Saturday†	18	16	1	3	1	2	$\frac{3}{4}$	$\frac{1}{2}$	1	1

Each Female Patient is allowed 1½ oz. of Tea, ¼ lb. of Sugar, and 1 Pint of Milk Weekly.

Each Male Patient is allowed 2 oz. of Coffee, ⅔ oz of Tea, and ½ lb. of Sugar weekly.

The tea and coffee, being infused in bulk, produces 1 pint of good tea morning and evening, for the Female Patients. One pint of good coffee in the morning, and the same quantity of tea in the evening for the Male Patients.

The Female Patients employed in the Laundry, Kitchen, &c., are allowed additional bread & cheese, and ½ pt. of beer. The Male Patients who work in the garden or on the farm, as well as those employed as shoemakers, tailors, bricklayers, carpenters, smiths, &c., are allowed for luncheon bread and cheese, and ½ pint of beer, and the same quantity of beer in the Evening.

* When Butter disagrees with the Patients, an equivalent in value of cheese is allowed. † On Tuesdays the Meat and Vegetables are made into an Irish Stew; occasionally Suet and Meat Pudding are substituted. ‡ On Saturdays, the Meat is made into a Vegetable Soup.

STATISTICAL TABLES.
